

## Twisted Wire Nose Piece

This nose piece option is made from 22-gauge floral wire. Since the length of wire is twisted, it is more durable than a single strand, holds up well in the laundry, and is comfortable.

1. Take a 7" piece of 22-gauge wire and fold it in half.

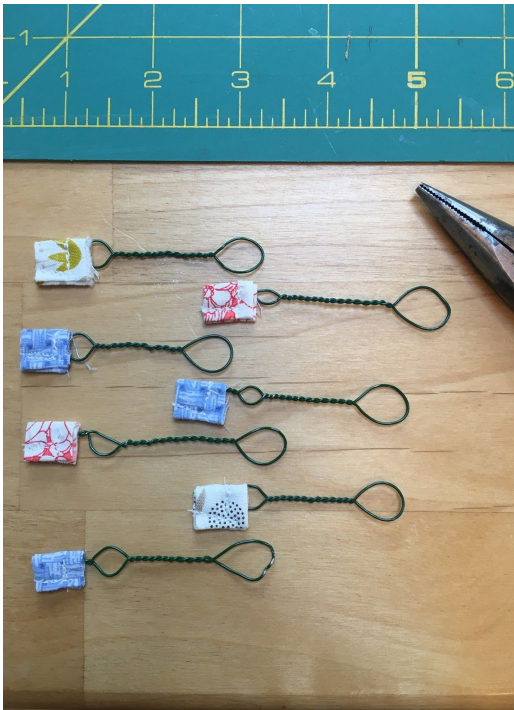

2. Twist the last 1" of the cut ends together and form the twist into a small hook.

3. Insert a small screwdriver into the loop and continue to twist the strands together.

4. Your nose piece should look like this.

5. Stitch a small fabric sleeve over the hook end of the nose piece to cover sharp edges.

6. Close-up of nose piece.

7. Before assembling the mask, zig-zag the nose piece in place on the wrong side of the outside piece, just under the top edge.

8. Close-up of stitching.
